

# Government and Military Facilities

## Mailroom, Checkpoint, Large Parcel and Mobile Inspection

Astrophysics is a world leader in global x-ray security with an extended government and military customer base. We provide a product line for application ranging from mailroom inspection to checkpoint security, large cargo and mobile screening. When throughput and advanced detection is critical, Astrophysics provides quality XIS systems with low cost ownership, innovative features and proven performance.

Astrophysics has the best lead times in the industry. We offer immediate screening solutions with

unparalleled order flexibility and customization.

All XIS systems are equipped with Real Time Diagnostics and 6 Color Imaging as standard features. Real-Time Diagnostics allows users to monitor machine health, thus greatly extending the system lifespan. Moreover, 6 Color Imaging enables operators to view screened objects in 6 Color, with each color correlating to a specific range of atomic Z-Numbers.

Backed by a team of experts with over 100 years of combined industry experience, Astrophysics

designs and manufactures its x-ray systems to the highest standards.

The XIS Series features top-of-the-line hardware and software technology, establishing Astrophysics as the leader in innovation and quality.

Astrophysics is headquartered in the United States, but boasts multiple field offices worldwide for localized support. We also retain a dedicated Sales and Service Team dedicated to a personalized and timely response 24/7. Contact your Astrophysics Sales Representative today to learn more.
